

DOCKPLATES

Aluminum Dockplate

Recommended for non powered dock loading applications only

- Available in two capacity ranges
- Low-cost solution to light dock loading activity applications
- Bolt-on steel legs for securing position between the dock and the trailer

The lip bend is 11° on every aluminum dockplate. The standard lip length for conventional trailers is 11", with an option of 14" lip length for refrigerated truck applications. Aluminum dock plates are designed to work well with pallet trucks or other non-powered dock loading equipment. The machine beveled deck edges allow for smooth transition between the truck and the loading dock.

DOCKBOARDS

Aluminum Dockboard

- Capacities from 10,000 to 15,000 pounds
- Full-length structural steel bolt-on curbs

Our Aluminum Dockboards have steel curbs bolted to the aluminum diamond pattern plate for increased strength, and to help prevent runoff. The locking legs provide secure positioning when in use. Our Aluminum Dockboards have a lip bend of 11°. Standard lip length for conventional trailers is 11", but we have an option of 14" for refrigerated applications. The Dockboards come in widths from 60 inches to 72 inches, and lengths from 36 inches to 96 inches.

Steel Dockboard

- Capacities from 10,000 to 20,000 lbs
- Ideal for Electric or Gas powered forklift loading applications

All Handi-Ramp welded steel dockboards provide a safe ramp for heavy-duty loading dock applications. Selecting the proper Handi-Ramp dockboard product for your application will improve product life, safety, and loading dock efficiency.
